“Not everything that can be counted counts, and not everything that counts can be counted. - Albert Einstein (1879-1955)”
The quote truly defines the nature of our business, and look forward to customers' appreciation of the same.

25 years of commitment to the customers:

This year EIGC crosses another landmark, that is, 25 years of dominant presence in the market. Over the years the company has grown from strength to strength. From virtually a very small operation, back in 1979, EIGC has transformed itself into one of the biggest producers and suppliers of gases and gas control equipment in the UAE and neighboring countries. It has become a force to reckon with in the field of gases and gas related products. Our technical team has earned its reputation as one of the best in the market in providing innovative and cost effective solutions to the customer's needs. Our technical expertise and experience makes us the only company in the UAE to hydro-test the jumbo tubes to international DOT standards. 25 years have transformed EIGC from being a mere gas producer to a TOTAL GAS SOLUTIONS provider.

Software transforms the current business practice:

EIGC, keeping pace with technology development, decides to upgrade its software by implementing the world's best ERP solution. The company is investing heavily in this Oracle application making the business transactions much faster, while minimizing the human errors.

The customers will benefit hugely by not only getting a speedy response to their queries but also will be able to track their business transaction at any given stage besides reducing the lead time to their deliveries. Through the implementation of the phase 2 of this software the customers will be able to access their account through the web and gain control of their order status.

Ranjith Nair, Marketing Manager

"Vacuum Jacketed Piping"

Industries like Food processing, Medical, Pharmaceutical, Engineering, and Biotechnology etc. demands the usage of cryogenic liquids for rapid cooling to very low temperatures, for the cold treatment of materials. Like in other applications, EIGC has pioneered the usage of Vacuum jacketed piping for its esteemed customers in the Food processing industry in UAE. The vacuum insulated piping offered by EIGC guarantees the most economic solution for the transfer of the cryogenic liquids, with the lowest loss rates.

EIGC provides all the necessary assistance in the design, installation and commissioning of the vacuum jacketed systems based on the requirements of specific customers.
